

User engagement and dissemination

WP11

Co-funded by
the European Union

PRIMAVERA

WP11 partners

- BSC (WP co-lead Dragana/Isadora, Marta)
- Met Office (WP co-lead Erika, Galia, Helen)
- KNMI (Janette, Eveline)
- Predictia (Daniel, Markel)
- University of Reading (David & postdoc)

Objectives of WP11

- To **advance the communication of scientific information** needed to develop climate risk response strategies for European businesses, and thus **strengthen their competitiveness and growth**
- To **engage with end-user groups from key economic sectors**, to exploit new capabilities in high-resolution global climate modelling and understanding with a focus on European climate, towards the development of **improved climate services**
- To ensure the project outcomes are **disseminated and communicated effectively** to business sector end-users

WP11 links / interdependencies with other WPs

- WP11 works closely with WP10 (monthly liaison calls)
- Liaison with WP8 re: engagement with Government stakeholders/policy makers
- WP10 and 11 need outputs from the simulations in order to show examples to users and hence put user engagement in appropriate context

Progress during the year

- Dissemination and communication plan (D11.1)
- (Potential) user lists prepared, incl. for transport, energy, water management, etc.
- Plans developed for user engagement: short video, survey, interviews, workshops, presentations at conferences
- Documenting other projects which have done similar user engagement, to reduce duplication & user fatigue

Plans for the next year

- Start user engagement in earnest:
 - Issue video & survey: ~Dec-Jan
 - Conduct interviews: ~Feb-Apr (planning now)
 - Plan & conduct workshops: timescales TBC (PRIMAVERA will be presented in ECEM/C4E user workshop in Feb)
- Deliver the delayed D11.6/MS27 (Apr'17?) – which in turn feeds into the delayed D10.1 (Oct'17?)
- D11.1 – to be updated each year
- D11.2 User interface platform (due Jun'17)
